

FILTER PRESS

18-5

The TERRAZZCO® Filter Press 18-5 is a portable slurry dewatering machine capable of creating one cubic foot of compressed solids from any slurry source. The filter press was designed to be a self-contained, fully automated, portable solution to on-site slurry disposal challenges. The machine has a hydraulic opening and closing mechanism, an on board air compressor, and integrated PLC control for complete filtration automation. The TERRAZZCO® filter press 18-5 is efficient and simple to use.

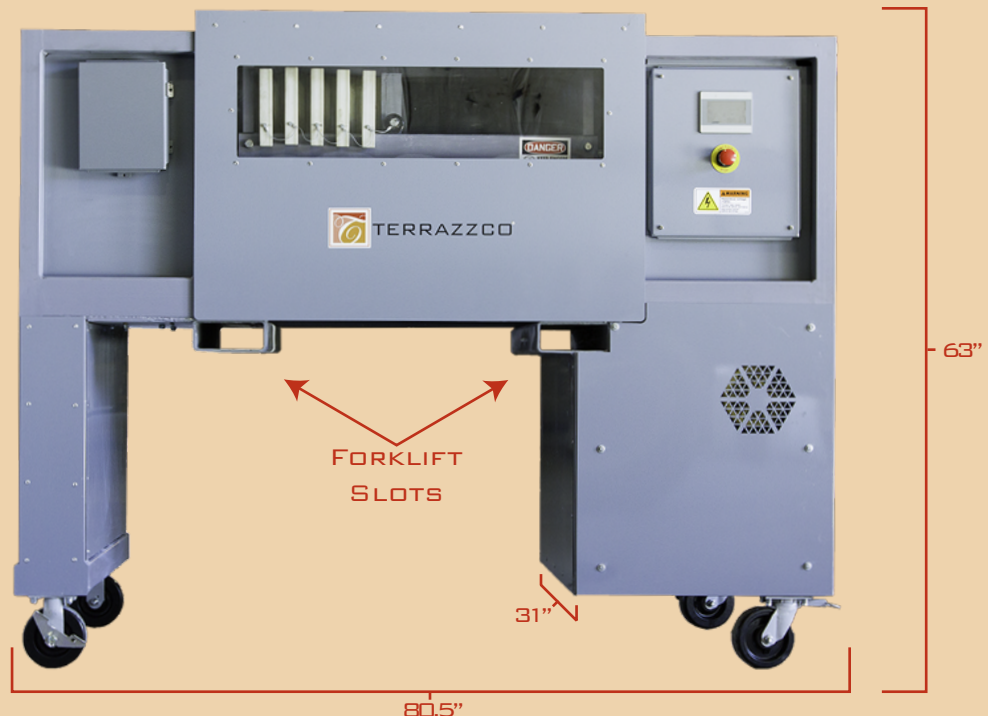

Advantages:

- Highly durable wheels for on-site portability
- Onboard compressor and slurry pump for quick plug-in use
- Fits through standard 32" door frame
- Small enough to be loaded in the back of a pickup truck
- Automation for continuous supply of recycled, clean water

Applications:

- Concrete grinding and polishing
- Terrazzo grinding and polishing
- Stone fabrication shops

Bring water reclamation process to a new level through intelligent design and creative solutions!
